

Josh Stone, E.I.T.

Staff Engineer

Mr. Stone is a petroleum engineer who delivers reservoir, environmental and regulatory engineering as well as field support to clients in the Oil & Gas and Energy sectors. His work spans Oil & Gas Conservation Commission hearings, underground injection control (UIC) projects, carbon capture, utilization, and storage (CCUS) projects, and field supervision of well workover operations.

Known for his adaptability, technical acumen and attention to detail, Mr. Stone brings a versatile skill set that enhances cross-disciplinary collaboration and drives project momentum.

Josh has experience in field supervision of well workover operations. His background covers workovers on a variety of artificial lift systems, including rod-pump, ESP, and PCP wells. He maintains strict well-control practices while upholding high safety standards and operational performance.

Education

B.S., Petroleum Engineering,
University of Wyoming,
2023

Certifications

Wyoming Engineer Intern: No.
EI 6927
Working toward Wyoming
Professional Engineer
Status
Drilling Operations (Well
Control) Certification, Well
Control School

Professional Memberships

Society of Petroleum
Engineers
Wyoming Geological
Association

Strengths

Project Management
Project Design
Process Improvement
Risk Management

Engineering Expertise

Environmental Engineering
Petroleum Engineering
Reservoir Engineering
Class I, Class II, Class V and
Class VI Injection & Disposal
Wells
Preparation Of Reservoir
Engineering Exhibits For
Expert Witness Testimony
Field Supervision Of Well
Workover Operations

EXPERIENCE

- Preparation of reservoir engineering exhibits for expert witness testimony at Wyoming Oil & Gas Conservation Commission (WOGCC) hearings
- Preparation of Wyoming Oil & Gas Conservation Commission (WOGCC) aquifer exemption and Class II disposal & injection applications
- Preparation of Wyoming Department of Environmental Quality (WDEQ) Class I UIC permit applications
- Preparation of annual pressure falloff test (APFT) analyses & reporting for Wyoming Department of Environmental Quality (WDEQ) Class I disposal wells
- Preparation of reservoir engineering exhibits for Carbon Capture Utilization & Storage (CCUS) projects
- Production decline analysis
- Pressure transient analysis
- Rate transient analysis
- Regulatory support for state and federal permit applications
- Field supervision of well workover operations
